

Neways Avoids 3000

In accordance with Neways ingredient paradigm, Neways maintains a list of over 3000 different controversial ingredients that we believe should be avoided in product formulations. Every year, researchers publish new information about product ingredients. Neways convenes its Scientific Advisory Board on a regular basis in order to review the science behind certain ingredients and make recommendations on Neways' usage of those ingredients. However, when new ingredients are added to our list, it is possible for existing items in Neways' broad range of products to contain these newly controversial ingredients. Neways therefore must begin the reformulation process which can take some time to fully develop and implement. Unfortunately, due to this ongoing process of discovery, evaluation, and reformulation, Neways may never be 100 percent compliant with the list of controversial ingredients. We are, however, proud of Neways' leadership position in the industry and we are confident that Neways' products offer unparalleled safety.
